TRANSPARENT STEERING WHEEL

KIN-SW

FOR XBOX 360® KINECT

Microsoft broke the mold by introducing the first controller-free gaming system, Kinect. But sometimes even the best ideas could use a little improving. CTA Digital introduces the Transparent Steering Wheel for the XBOX 360™ Kinect. The transparent steering wheel allows the Kinect camera to track the hands of the player while adding a more realistic feel to your favorite Kinect racing games. By keeping your hands parallel and stable on the steering wheel, you'll avoid muscle fatigue while ensuring the Kinect Camera™ can track every turn with the utmost precision. So you'll be able to maneuver your way through the game with added accuracy and ease. The Steering Wheel is compatible with all Kinect racing games, including Joy Ride™, and Forza Motorsport 4. So instead of fumbling around trying to find the correct position for your hands, simply hold the steering wheel in front of the Kinect camera and drive away!

Features include:
- Made of a durable and lightweight plastic.
- Compatible with all Kinect racing games.

Package includes:
- (1) Transparent Steering Wheel

Compatible with the following System:
- XBOX 360™ Kinect
